SKILLS

Mobile
Flutter, Dart, iOS, Android, Flutter Web, Native plugins (Swift, Kotlin), BLoC, Clean architecture

Calls & Devices
WebRTC, SIP, CallKit, WebSockets, BLE

Integrations
Firebase, OneSignal, PostHog, RevenueCat, Apple / Google Pay, Sentry

Flags & Analytics
Feature flags, A/B tests, PostHog funnels & dashboards

CI/CD & Testing
Codemagic, GitHub Actions, Shorebird, Unit / widget / E2E tests

AI & Backend
Claude Code, Codex, MCP servers, Dart backend, Docker, Linux

Earlier
Ruby, Java, OpenGL ES, gamedev

Sergey Savchuk

Senior Flutter Developer · AI-Native

Flutter developer with 9 years in cross-platform mobile, from games to production apps with native calls and integrations. Since 2026 I work AI-native: agents speed up delivery, I own architecture and quality. Especially interested in AI-automated development workflows.

EXPERIENCE

AI-Native Mobile Developer (Flutter) Jan 2026 – Present
EVO electronics (smart buildings) · Contract · Remote

- Still lead developer of the same apps: new features and store releases.
- Delivery is now AI-native: Claude Code and Codex agents do much of the implementation; I own architecture, code review and releases.
- Built an agent-driven delivery pipeline: tasks go from a Kanban board to agents working in isolated containers and come back for review, with custom MCP tools and one-click deploy.
- Built a release dashboard for App Store and Google Play deployment.

Mobile Application Developer (Flutter) Jan 2024 – Dec 2025
EVO electronics (smart buildings) · Contract · Remote

- Lead developer of a family of smart-building apps on a shared feature library, released as several brands.
- Built video calls to building intercoms (SIP, WebRTC, CallKit) with native Swift and Kotlin plugins.
- Integrated WebSockets, push and payments; CI/CD with over-the-air hotfixes.
- Shipped features behind feature flags (gradual rollouts, kill switches, A/B tests) and measured them with PostHog funnels.

Flutter Developer Oct 2021 – Dec 2023
Freelance · Remote / Minsk

- Delivered client apps end to end: 19 contracts and 13 FL.ru reviews, all 5.0.
- Led an ELD trucking app for US truck drivers; worked on its BLE plugin for the ELD device.
- Team lead for a government IT department client: planning, code reviews and mentoring; introduced CI/CD.

Software Engineer — Mobile Games, Build & Tools Nov 2017 – Oct 2021
Vizor Interactive (Vizor Games) · Minsk

- Built game logic and UI for Zombie Castaways and Klondike Adventures; optimized rendering and builds, wrote in-house Ruby tooling.

OPEN SOURCE

Contributor to vosk-flutter (plugin rework, Linux/Windows desktop support via FFI), Flutter Holobooth and the Tiled map editor.

EDUCATION

Belarusian State University of Informatics and Radioelectronics — Bachelor of Software Engineering and Game Development
